# OVERVIEW

---

Experience powered flight in the purest way possible. The SAFARI 400 is an upgraded 1990 Mark Richards Commuter II helicopter with a design that dates back to the earliest rotary wing designs. The simple design and construction allows for pilots to strap on the helicopter and fly.

With a bubble cockpit and doorless design, you'll feel the breeze from the moment you lift off. With a lower operating cost than a comparable light helicopter, the SAFARI 400 performs well as a trainer and primary helicopter.

N3338T is a factory demo model with the added convenience of skid-mounted tires for better ground handling. This is a great option for a pilot new or transitioning to rotary wing, or a rated pilot who just wants some low-cost fun.

# COMMENTS

---

## Interior

Rated 6.0

- Two seats, completed in white leather

## Exterior

Rated 8.0

- Primary color: Red

## Comments

- Updated Mark Richards Commuter II to Safari 400
- Factory demo unit when built
- Wheels attached to skids for easier ground handling
